

retico · a signal the face can act on early, and still take back
it may act on a guess, because it can also undo one

1 · heard so far
“is that a cat”

2 · revised
“cat” is withdrawn

3 · settled
“is that a cap”

the brow is already
rising, mid-word

the rise reverses
before it finished

the reply begins

Vizij · the robot's face is a set of named channels
expression is one value written to one channel; the rig re-solves every frame,
so channels compose instead of overwriting

gaze

brow

mouth

eyelids

head

expression
